

Brüel & Kjær Vibro
a spectris company

The world is a safer, more efficient place thanks to our technology.

Be a part of it with a career at B&K Vibro

Do what we do.

Brüel & Kjær Vibro (B&K Vibro) is the world's leading independent supplier of sophisticated electronic systems and software to protect and manage the condition of critical rotating machinery. Machines like turbines, compressors, pumps, fans, blowers, generators, and many more.

All of the processes that make modern life possible and keep industry moving – from the petrol we put in our cars to the water that comes out of our faucets – are powered by machines. And that's precisely where you'll find us. See that wind turbine? Chances are, we're there. That offshore platform? We're there, too. That refinery? That steel mill? That hydroelectric dam? Every one of them can be home to our high-technology systems and services.

Simply put, this is a business we love. We've been delivering world-class products and services to our customers for nearly 60 years, and we plan to continue doing so for many years to come.

Find your place.

We manufacture in

3 global locations

including one in North America and two in Europe.

With **270 employees**
worldwide, we are close to our customers

in **50+ countries.**

We maintain remote machinery monitoring and
surveillance centres on

3 continents.

Our sales and service employees can be
found on every continent in which industry
can be found.

Opportunities at B&K Vibro abound:

- Engineering and product design
- Software development
- Manufacturing, testing, and quality
- Finance and Administration
- Field services
- Supply chain
- Marketing
- Sales

Pioneer with us.

Our legacy of innovation extends back more than 60 years and it shows no signs of stopping. We've introduced a number of industry firsts, whether it was the first industrial accelerometer, the first monitoring system to feature a built-in flight recorder, the first provider to harness powerful signal processing techniques like Cepstrum, or the first company to offer condition monitoring in a commercial process historian, we are all about the relentless pursuit of doing things better than we did them yesterday.

We love to delight our customers, and we want people that love to do likewise. Whether it's through incredible new technology to “wow” our customers or simply answering the phone with a smile in your voice and an attitude that says “I love this place”, we're determined to deliver the best customer experience in the industry through a culture of restless innovation and a culture of truly caring for our customers.

Make a difference.

Our technology protects machinery so that it runs safer, longer, and more efficiently. What we do here matters – and our people take pride in knowing what they do matters, delivering quality products and an exceptional customer experience. We're ever mindful that our customers place immense trust in our solutions, and that we are responsible to continue earning that trust every day.

As part of B&K Vibro, you'll be part of a team that makes a difference.

Share our values.

Absolute Integrity – Even when it means walking away from business that violates our code of ethics.

Empowerment – Giving employees the freedom to chart their own course and look for better ways to deliver value.

Restless Innovation – Never being satisfied with how we did things yesterday when a better way can be found tomorrow.

Customer Focus – We never forget that customers are the reason we exist and that we must continue earning their trust each and every day. Without them, we have no business, no gainful employment, and nothing to fuel our innovation.

High-Performance – We're a culture where excellence breeds excellence and an atmosphere of high performance is pervasive and contagious.

Test drive us.

As an intern or working student, you can gain practical experience while immersing yourself in our corporate culture and global customer base. Discover new things, hone your skills, and taste what a truly 24/7 global business is all about. You just might find that this isn't only a place to start your career – it's a great place to spend your career. If you're looking to write your thesis on a topic of practical work experience, we look forward to hearing from you and identifying the many exciting ways we can work together.

Maintain a balance.

While many of those in our workforce are engineers, many others are not. Like every business, we need people in all disciplines – from accounting to marketing to manufacturing and logistics to HR. So whether you're a technology-minded geek, or the complete opposite, we offer an environment where you'll be valued and where your unique skills can find a home.

Take a step.

Explore our career openings at www.bkvibro.com/career and learn more about what makes us a special place to work with opportunities that span the globe. You just might find that it's the most rewarding journey you'll ever take.
