Statement of Conformity

REACH Regulation (EC) 1907/2006

The EC REACH Regulation (No. 1907/2006), which came into force on July 1st, 2007 has wide ranging implications for all areas of industry.

The products manufactured and supplied by Brüel & Kjær Vibro are classified as 'articles' under the REACH regulations and have no intentional release of substances or preparations during normal use. As such Brüel & Kjær Vibro has not itself undertaken any pre-registration or registration activity.

However, as both a downstream user and importer of substances and preparations, Brüel & Kjær Vibro is directly affected by the legislation. Since its introduction we have been in regular communication with our suppliers to ensure that they, and where applicable their Only Representatives, complete pre-registration and subsequent registration in line with the required timescales.

In addition, Brüel & Kjær Vibro closely monitors the on-going revisions of the Candidate List of Substances of Very High Concern (SVHC)¹ and is committed to informing its customers promptly of any occurrences where such substances are present in Brüel & Kjær Vibro products above a concentration of 0.1% w/w of the article.

If you have any questions regarding this matter, please do not hesitate to contact your usual Brüel & Kjær Vibro representative and we will provide any additional information requested.
